

The image shows the DFX Audio Enhancer software interface. It features a spectrum analyzer at the top with a bar chart showing frequency bands from 20Hz to 16kHz. Below the spectrum are several sliders for FIDELITY, AMBIENCE, 3D SURROUND, DYNAMIC BOOST, and HYPERBASS. There are also buttons for MUSIC TYPE I, MUSIC TYPE II, SPEAKERS, and HEADPHONES. A PRESETS section is visible at the bottom left.

DFX boosts the audio quality of your favorite medi **GH**
Simply turn on DFX and be immersed in HD quality sound.

- **3D Surround Sound**
Immerse yourself inside the music
- **Stereo Ambience**
Renew lost stereo depth and body
- **Dynamic Audio Boost**
Pump up the volume
- **Headphones Optimization**
Hear more pleasant, natural sounds with headphones
- **Customizable Audio Presets**
Select from many factory-tuned settings or create your own
- **Booming HyperBass**
Produce deeper, richer bass
- **High Fidelity Restoration**
Eliminate that "muffled" sound
- **Spectrum Analyzer**
"See" DFX enhance your sound
- **Multiple Processing Modes**
Optimize sound quality for music, speech and other audio types
- **Preset to Song Association**
Get the perfect sound for each song you play
